

Zeitraum

A deliberately pure, understated aesthetic, timeless design and a love of natural wood: since 1990, the company Zeitraum based in Wolfratshausen near Munich has brought design and ecology together in its furniture concepts with worldwide success. The solid wood specialists combine traditional craftsmanship with technical innovations to continually push the limits of material processing.

Morph

Dynamic and stable all in one: The positioning of the legs gives Morph its unique posture. The Morph product family includes chairs, bar stools and lounge chairs. Delicate, light and uncomplicated, the model takes up very little space with its solid wood frame and moulded wood seat shell (also available fully upholstered), but leaves a lasting impression with its sculptural base frame.

Plaisir

One name – one concept: “avec plaisir” – with pleasure – this side table is inspired by oriental tray tables. The high, slender version holds a delicate removable wooden tray. In the low version, you can choose between an aluminium tray or an appropriately sized solid wood plate.
