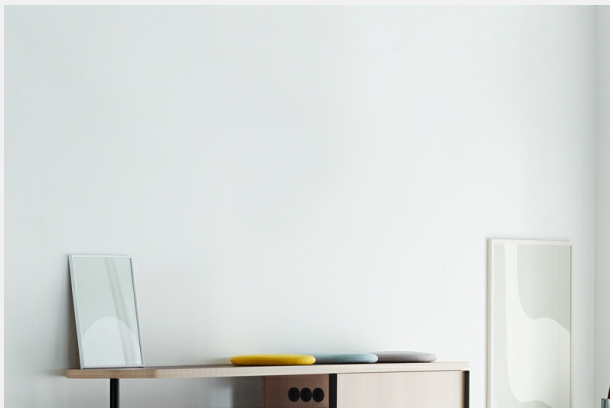
ophelis deem



ophelis deem est un kit de meubles de bureau qui favorise le travail en commun, agile et créatif. Un podium, des murs de présentation mobiles, des bancs et des tables sur roulettes et des systèmes de séparation de l’espace multifonctionnels constituent ce kit.
Concept : Till Grosch, Studio Grosch Berlin pour ophelis 2018

Le travail d’équipe en mode agile exige des courtes distances et des échanges continus au sein de l’équipe. Les projets conduits en mode agile, c’est aussi une communication sans hiérarchie. Le travail et les interactions n’ont pas lieu dans les salles de réunion classiques mais nécessitent un agencement du bureau permettant à chacun·e de jouer les rôles d’auditeur et d’intervenant. L’équipe agile s’approprie l’environnement de travail et l’organise selon les besoins du projet. ophelis deem a été créé pour répondre à ces nouveaux impératifs.

Caractéristiques du produit

Famille de produits pour travail flexible et agile

- **Tables** sur roulettes avec bloc prise encastrable (prise de courant et port usb)
- **Tables hautes sur roulettes avec** bloc prise encastrable pour courant et enrouleur automatique
