

nouveau : paravento XL

Le grand frère du système de cloison paravento : paravento XL

paravento XL est un système modulaire de cloisons acoustiques et visuelles indépendantes. Développé par ophelis dans le cadre d'un projet client, ce système de séparation permet de diviser l'espace indépendamment des murs, de mieux répartir les bureaux groupés et de bien séparer les zones réservées aux visiteurs.

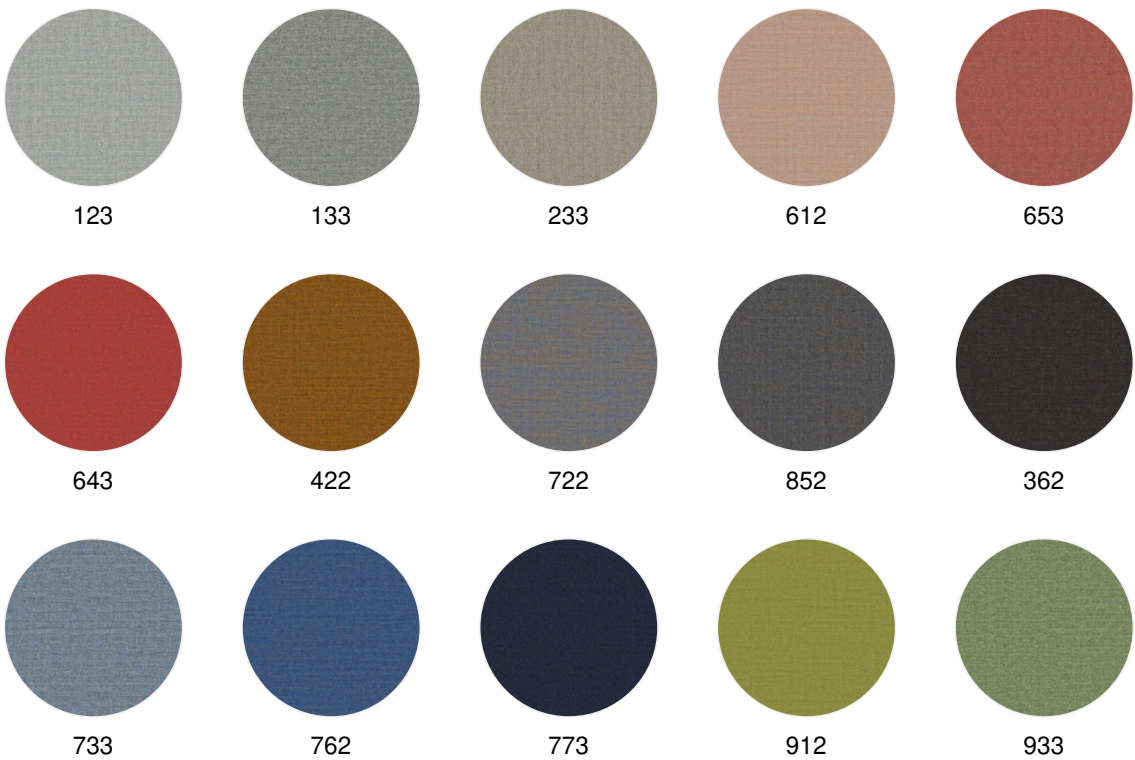

Caractéristiques du produit

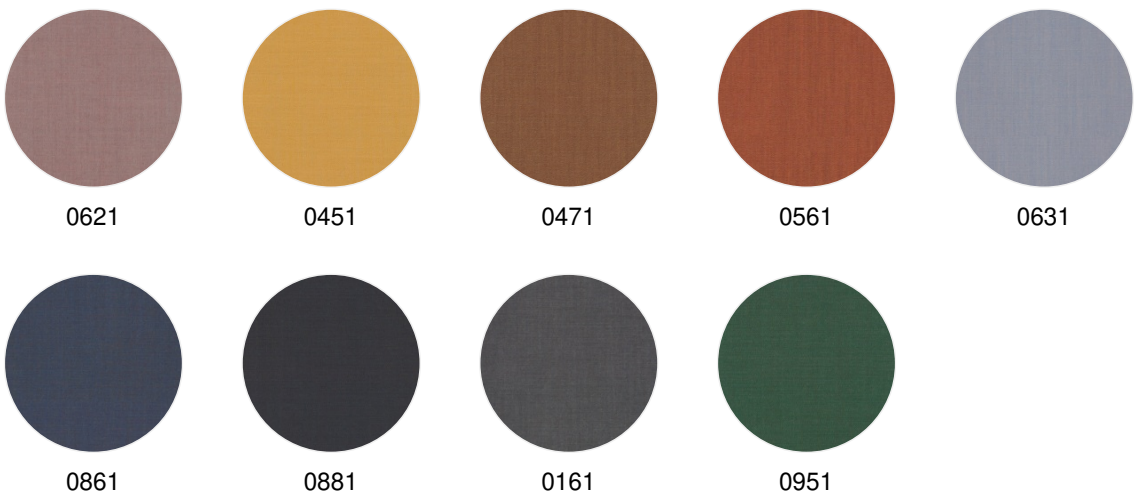

- La disposition en T ou en L permet à ce système de cloison d'être efficace au niveau acoustique où on le souhaite dans l'espace, il ne nécessite par ailleurs aucun stabilisateur supplémentaire et peut revêtir différents matériaux
- Différentes surfaces peuvent être sélectionnées: Éléments mélamine, Whiteboard et tissu (simple et double face)
- Plusieurs largeurs sont disponibles et sont reliées de manière invisible. paravento XL peut être combiné avec le système de cloison textile paravento et peut également être utilisé seul au niveau du poste de travail.
- Intégré au poste de travail, paravento XL offre un très haut niveau de protection acoustique
- En outre, des câbles peuvent accéder discrètement sur le poste de travail.
